OBJECTIVE

Full-Stack Mobile Application Developer with experience developing Flutter applications backed by RESTful APIs using Node.js and Express. Skilled in implementing BLoC, Clean Architecture, and integrating Firebase services for authentication and notifications. Focused on building clean, modular, and scalable mobile application features.

SKILLS

Languages	Dart, Java, JavaScript, SQL
Frameworks	Flutter, BLoC, Provider
Backend	Node.js, Express.js, Firebase, Supabase, REST API Development
Tools	Android Studio, VS Code, GitHub, Figma
Concepts	Rapid Prototyping, Clean Architecture, Agile, Responsive Design
Soft Skills	Communication, Problem Solving, Teamwork, Adaptability, Time Management

EXPERIENCE

Flutter Developer Intern (Remote) DevelopersHub Corporation, Islamabad	May 2025 – July 2025
- Developed and maintained cross-platform mobile applications using Flutter. - Applied BLoC architecture for scalable and efficient state management. - Participated in Agile sprints and utilized Git for version control.	

PROJECTS

Final Year Project – Cross-Platform Service Booking System (In Progress) <i>Flutter, BLoC, Node.js, Express.js, Supabase, Firebase</i> - Developing a full-stack mobile system with Flutter frontend and REST-based backend. - Designing Node.js & Express APIs for authentication, booking workflows, and notifications. - Integrating Supabase (PostgreSQL) and Firebase Cloud Messaging.	
Chatzilla – Real-Time Messaging App <i>Flutter, BLoC, Firebase, FCM</i> - Built and deployed a real-time messaging application using Firebase-backed architecture. - Reduced unnecessary widget rebuilds using structured BLoC state management. - Published app to Google Play Store (Closed Testing), handling builds, signing, and release management. - GitHub: github.com/mun33b-exe/chatzilla	
Doctor Drive – Vehicle Diagnostics Mobile App <i>Flutter, Dart, OBD-II, WiFi, Clean Architecture</i> - Developed a mobile application integrated with an OBD-II device to display diagnostic fault codes. - Handled asynchronous data streams from external hardware over WiFi. - Applied Clean Architecture principles for modular, scalable device-data integration. - GitHub: github.com/mun33b-exe/doctor.drive	
UniWeek – Event & Schedule Management Mobile App <i>Flutter, Provider, Supabase, FCM, Clean Architecture</i> - Integrated Supabase for structured data storage and real-time updates. - Implemented push notifications using Firebase Cloud Messaging for reminders and event updates. - GitHub: github.com/mun33b-exe/UniWeek	Visio Spark '25 Competition

EDUCATION

BS – Software Engineering , COMSATS University Islamabad	Sep 2022 – July 2026
FSc – Pre-Engineering , Aspire Group of Colleges	2020 – 2022
